WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

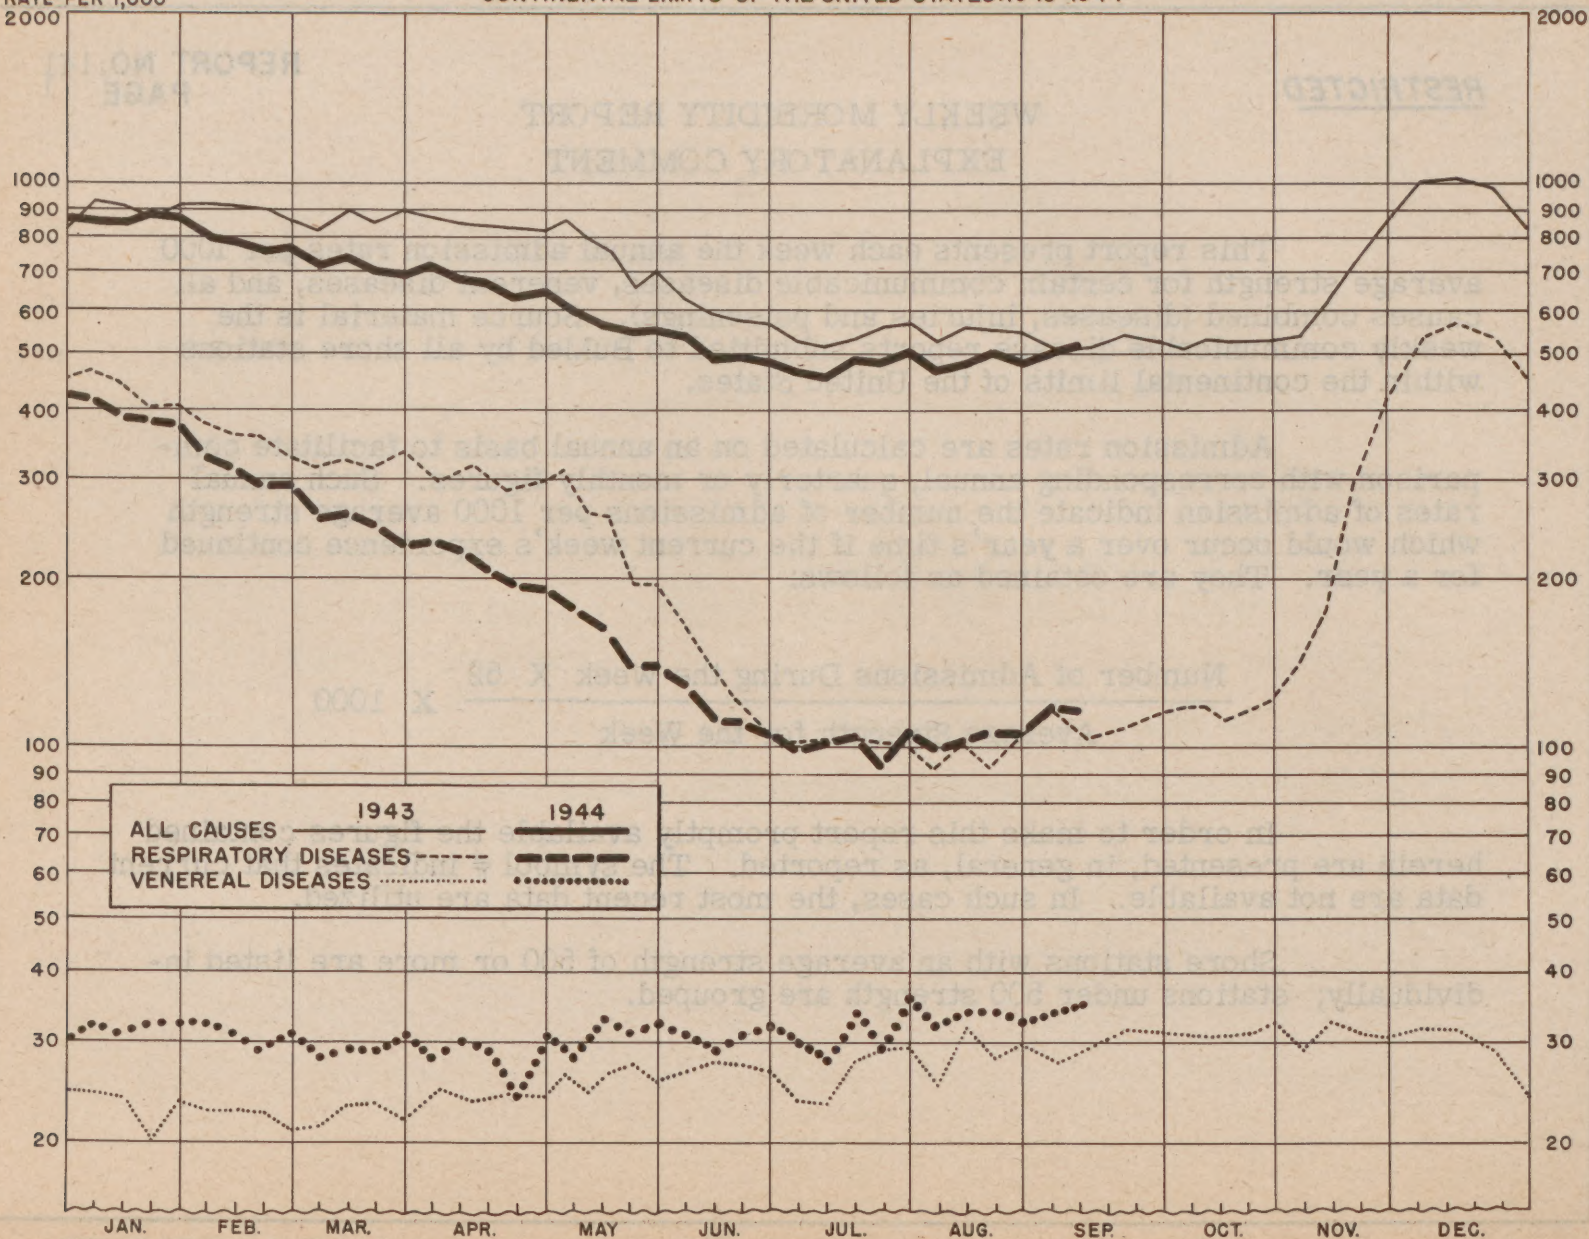

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

CURRENT TRENDS

Week Ending 9 Sep 1944

The admission rate for All Causes rose sharply again this week. The highest rate (877) was reported for the Potomac and Severn River Commands, the lowest (408) for the 8th District.

The respiratory disease curve fell slightly but stands above the 1943 curve for the corresponding period. The 13th District reported the highest rate (249), the 7th and 12th Districts the lowest rate (87).

The venereal disease rate rose slightly again this week and the 1944 curve continues to stand above the 1943 curve. The 12th District reported the highest rate (45), the 9th District the lowest (20).

Influenza and Catarrhal Fever. The rate for these infections rose slightly this week and the usual autumn rise in the curve becomes evident. The rate for the week 81.09 compares favorably with a rate of 132 in 1942 and a rate of 100 in 1943 for the corresponding week. The 9th District reported the highest rate (124), the 4th District the lowest (63).

Pneumonia--Broncho and Lobar. After a slight drop in the previous week the rate for these infections returned to 1 this week. The curve had stood at 1 for the preceding nine weeks. The 13th District reported the highest rate (6). The 4th, 6th, and 7th Districts reported no cases.

Pneumonia, Atypical. The atypical pneumonia rate was reported for the third consecutive week at 2. The 1944 curve continues to stand above the 1943 curve for the corresponding period. The 4th, 8th, and 11th Districts each reported a rate of (4). The 13th District reported no cases.

Tonsillitis and Pharyngitis, Acute. After a rise in the previous week the rate for these infections dropped this week to 33. The highest rate (132) was reported for the 13th District, the lowest (18) for the 7th District.

CURRENT TRENDS --CONTD.

Rheumatic Fever, Acute. After a slight rise in the previous week the acute rheumatic fever rate dropped slightly this week. The rate for the present week 0.86 compares favorably with a rate of 1.7 for the corresponding week of 1943. The highest rate (5) was reported for the 13th District. The 3rd, 4th, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The scarlet fever rate was reported for another week at 4. The rate for the corresponding week of 1942 was 0, for the corresponding week of 1943 it was 4.7. The 13th District reported by far the highest rate, that of (67). No other District reported a rate over 3. Five Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The curve for this infection continued another week at 0.12. The rate for the corresponding week of 1942 was 0.1, for the corresponding week of 1943 it was 0.3. Cases were reported only from the 9th and 11th Districts.

Malaria. The malaria curve continued another week at 4, well below the 1943 level but above the 1942 level for the corresponding period. The Potomac and Severn River Commands reported the highest rate (11), the 9th District the lowest rate (0.96).

Measles. After a slight fall in the previous week the measles rate rose slightly this week. The rate of 0.77 for the week compares favorably with a rate of 0.8 for the corresponding week of 1942 and 1.1 for the corresponding week of 1943. The highest rate (2) was reported for the 9th District. The 4th and 6th Districts and the Potomac and Severn River Commands reported no cases.

Poliomyelitis, Anterior, Acute. Three new cases of poliomyelitis were reported for the week among Naval personnel in Continental Shore Stations. Two were reported from the 3rd District and one from the 9th District. The cumulative total of cases occurring among Naval personnel in Continental Shore Stations since Jan 1, 1944 is 40.
